ABSTRACT

This Market Analysis of Presence technologies is aimed at providing a guidance on future market trends and opportunities for Presence science and technology, based on the analysis of the current market and inputs from the Presence Community.

This document has two release issues. The first, May 2008 and the second April 2009. Therefore, the document will be a living document with contributions from the Peach Social Impact, Ethics and Legal Issues WinG members (Working Group 4) and the Peach Team. The community at large should also provide feedback to this Market Analysis for their own benefit.

The present document is the first of two issues, and aims at providing a structured baseline and first analysis of the market for further discussion. The second issue will provide an extension of this analysis and focus more on future trends.

This ANNEX 1 is a reasoned list of Companies working on Presence, and constitutes an integral part of the Market Analysis of Presence Technologies deliverable.
